

ZOHAIB RAHIM

Computer Science Student | Data Analytics & Automation | Project Management

(778) 847-2562 | zrahim@unbc.ca | linkedin.com/in/zohaibrahim | github.com/zohaibrahim | zohaibrahim.vercel.app

MASTER RESUME – Complete Information Bank (multi-page, not submission-formatted)

PROFESSIONAL SUMMARY

Final-year Computer Science co-op student (UNBC, Management Information Systems & Philosophy minors, expected April 2027) with a co-op track record of measurable operational impact – a 30% reporting-cycle reduction and 40% scheduling-error cut at the Provincial Health Services Authority, and 100% paper-based collection eliminated across 20+ global schools at the Aga Khan University. Combines production-level Power BI dashboards, Excel automation, and process engineering with hands-on ML and security research – including a fine-tuned transformer guardrail for LLM jailbreak detection (89.7%, Applied Machine Learning) and a deployed retrieval-augmented-generation system with grounded, cited answers – and a 1st-place finish, Business Technology Management, JDC West 2026.

CORE COMPETENCIES

Analytics & BI: Power BI (DAX, KPI dashboards, built-in forecasting, trend analysis), Excel (Advanced – automation, pivot tables, complex formulas, alerts), SQL, MS Access (Advanced)

Machine Learning & AI: PyTorch, Hugging Face Transformers, Scikit-learn, TensorFlow, BERT/DistilBERT fine-tuning, model explainability (PCA, centroid/cosine analysis), imbalanced-data methods (SMOTE), retrieval-augmented generation (hybrid BM25 + HNSW retrieval, LLM reranking), Azure AI Search, Azure OpenAI

Engineering & Automation: Python (log parsing, classification), Bash (log parsing with grep/awk, associative-array aggregation), PowerShell (log alerting, AD/GPO scripting), Java, C++, TypeScript, Node.js, Express.js, Angular, React, PostgreSQL, HTML, Power Automate, GitHub Actions CI/CD

Security: Active Directory basics (TryHackMe certified, June 2026), Security Procedure & Playbook Documentation, Log Analysis & Alert Triage, Regulatory Frameworks (GDPR, PIPEDA, CCPA, NIST, ISO 27001, HIPAA, PCI DSS)

Cloud & DevOps: Microsoft Azure, Azure App Service, Vercel, SharePoint (incl. cross-org permissions/access administration), Microsoft Fabric (in progress), Microsoft 365, Microsoft Forms

AI & Dev Tools: Claude Code, Stitch, Perplexity, Ollama, GitHub, Postman, pgAdmin

Design & Media: Adobe Photoshop (Advanced), Adobe Premiere Pro, Wondershare Filmora, WordPress, Weebly, UX/UI Design

Professional: Project Management, Business Analysis, Stakeholder Pitching & Buy-In, SOP Development, Stakeholder Reporting, Process Automation, Knowledge Management, Cross-functional Collaboration, Role Allocation Under Team Pressure

Languages: English, Urdu, Khowar (native) | Hindi, Punjabi, Gujarati (proficient) | Spanish, French (elementary)

PROFESSIONAL EXPERIENCE

Aga Khan University – Remote – Geneva

Nov 2025 – Mar 2026

ECD Programme Innovation & Digital Solutions Intern

- Identified that the ECD Leadership Hub SharePoint site was inaccessible to most of its intended users because it was hosted under my mentors' organization with no access bridge to staff at the other 20+ schools across 10 countries – raised this with my mentor and worked with the internal IT team to secure the correct cross-org permissions, resolving the root blocker before any UX work could matter.
- Once access was restored, redesigned navigation, information hierarchy, and stakeholder workflows for multi-regional teams with varying technical backgrounds, and corrected a permissions oversight where administrative settings pages were visible to end users.
- Talked directly with country leads to identify recurring needs; the most common request was a way for schools to see and reuse each other's materials instead of building from scratch, so added a shared cross-country resource page where each country could post its own files for other schools to view.
- Eliminated paper-based data collection across 20+ schools in 10 countries, by designing a structured digital assessment database and deploying Microsoft Forms and Power Automate workflows to automate ECD classroom data intake and multi-level approval processes.
- Delivered zero-dependency platform continuity post-handover, by producing comprehensive SOPs enabling non-technical moderators to independently operate and maintain all platform functions.

Provincial Health Services Authority (PHSA) – Prince George, BC, Hybrid

Sep 2024 – Apr 2025

Project Manager 1 | Co-op – Team: UHNBC (University Hospital of Northern British Columbia)

- Identified an unaddressed reporting gap – two analysts were manually filling spreadsheets with stock numbers across 8 Northern BC cities straight from the source system, with no visualization, so any comparison meant scanning a large sheet of raw numbers. Building a dashboard was not part of any existing plan; proactively pitched the idea to a skeptical manager and built an initial version to demonstrate value rather than only propose it.
- Iterated the dashboard based on direct manager feedback – the first version surfaced min/max stock values, which the manager corrected to averages for his reporting needs; presented several report-format options rather than assuming, which is how the final four graph views and KPI cards were selected.
- Reduced manual reporting cycles by 30% and accelerated decision-making by 25% (Feb–Apr 2025), by engineering a production Power BI dashboard tracking stock inventory across 8 Northern BC cities – Dawson Creek, Fort St John, Kitimat, Prince Rupert, Quesnel, Smithers, Terrace, and surrounding areas – spanning 9 years of historical data (2016–2025), with DAX-driven KPI cards, YoY comparisons, and adjustable-range city benchmarking.

- Built a 5-year stock demand forecast using Power BI's built-in forecasting model, deliberately excluding the COVID period from the baseline as a clear demand anomaly that would otherwise distort the trend. Note for future reference: the forecast was not independently cross-validated against historical actuals after deployment – a gap worth closing on any similar future build.
- Cut scheduling errors by 40% and improved operational efficiency by 30% (Sep–Nov 2024), by designing a fully automated weekly Excel scheduling system for UHNBC store operations – single-cell dynamic date headers, formula-based daily staffing-gap counters, an automated CASUAL-coverage alert system, iterative-calculation circular-reference resolution, and a status-code system (OFF, VAC, SICK, STAT, NA, IN LIEU) covering 20+ employees across 8 position types.
- Standardized 6 categories of operational Excel files (schedules, call logs, checklists, stock statuses, assignments), reducing time-on-task by 30% across UHNBC departments, by implementing data validation, formula automation, and documentation standards.
- Achieved 100% documentation compliance across all operational roles, by reviewing and validating 26 SOPs against PHSA standards through hands-on testing and cross-team coordination.

Roshtay – Web & AI Solutions – Remote

Apr 2026 – Present

Founder | roshtay.com

- Launched and scaled a production web & AI solutions studio with 3 live client applications, by executing a structured multi-tool workflow: Perplexity (research) → Claude (design) → Stitch (UI) → Claude Code (dev) → GitHub/Vercel (CI/CD deployment).

University of Northern British Columbia – Prince George, BC

Sep 2023 – Apr 2025

Student Assistant & Course Marker | MS Excel, MS Access, Sage Accounting, Pivot Tables

- Maintained 97% grading accuracy across 200+ student submissions; validated MS Access and Sage Accounting system images before deployment and coordinated IT resolution for flagged issues.

Home Depot Canada – Prince George, BC

Apr 2024 – Present

Special Service Associate | Retail Sales Associate

- Exceeded individual sales targets by 7% and sustained a 94% 'Likely to Shop Again' customer satisfaction score; received the Homer Award for professionalism and outstanding performance.
- Maintained an 81% GET score while serving as liaison between customers and fulfillment/services teams for large orders, deliveries, and vendor-coordinated installations.

Pinar's Honey and Dry Fruits – Pakistan, Hybrid

Jul 2020 – Apr 2024

IT Specialist

- Reduced data retrieval time by ~60% by redesigning relational database architecture in MS Access; managed inventory tracking, sales reporting, and customer analytics using Excel – contributing to a ~30% increase in sales performance.
- Grew social media engagement by 90% through content creation, account management, and marketing materials designed using Adobe Photoshop and Wondershare Filmora.

Independent Freelancer – Remote

Jul 2019 – Dec 2023

Web Developer & Graphic Designer

- Achieved 94% client satisfaction rate across all engagements, generating 15 repeat clients; increased social media engagement by 70% on designed content.
- Boosted e-commerce conversion rates by 70% through improved website design and UX optimization for client Popatiya Enterprises (Nov 2020 – Aug 2022).
- Grew social media engagement by 45% through visually compelling content produced for Kaamnoosh (Sep 2020 – Jan 2021).

Walmart Canada – Pakistan

Dec 2022 – Apr 2023

Front-End Associate

- Maintained 94% transaction accuracy and 86% customer satisfaction score in a high-volume front-end environment.

Mind Art – Pakistan, Remote

Nov 2020 – Present

Founder

- Founded and led Mind Art, a creative design initiative producing digital content, graphic design, and community engagement materials – managing end-to-end creative production and client relations since 2020.

Jahangir Memorial Football Academy – Pakistan

Jul 2021 – 2023

Coach – Under-10 Division | Captain – Under-19 & Senior Club

- Developed and delivered structured training programs as head coach of the Under-10 division, while serving as team captain for Under-19 and Senior Club teams across district-level competitive tournaments.

PROJECTS – FULL PORTFOLIO

Machine Learning, AI & Data Science

Enterprise LLM Jailbreak Detection – 3-person team

Jan 2026 – Apr 2026 (approx.)

Python, PyTorch, Hugging Face Transformers, DistilBERT / BERT-base-uncased – CPSC 461, Applied Machine Learning

- Co-developed a fine-tuned transformer guardrail that classifies enterprise LLM prompts as jailbreak or benign before execution, published as a research paper. Individually designed and implemented a model-agnostic layer-wise probing pipeline – validated across DistilBERT's six hidden layers using centroid distance, cosine similarity, and PCA – to quantify where jailbreak/benign separability emerges inside the model, reaching up to 89% accuracy

and a 0.87 F1-score. The team's later BERT-base-uncased extension (12 layers) reached 92.4% accuracy and 0.905 F1; a hybrid classifier combining softmax probability with the geometric direction score reached 90.3% accuracy and 0.891 F1.

Credit Card Fraud Detection

Sep 2025 – Dec 2025 (approx.)

Python, Scikit-learn, TensorFlow, SMOTE – CPSC 473, Introduction to Data Mining

- Co-developed Logistic Regression and MLP classifiers with a project partner on an imbalanced real-world Kaggle dataset (284,807 transactions); led the precision-recall trade-off analysis identifying the MLP as the best-performing model with the fewest false positives, using SMOTE-based class balancing.

Analytics & Business Intelligence

PHSA Stock Inventory Dashboard

Feb 2025 – Apr 2025

Power BI, DAX, Excel

- Production dashboard tracking stock inventory across 8 Northern BC cities (2016–2025); DAX-driven KPI cards, YoY comparisons, adjustable-range city benchmarking, and a 5-year forecast (built-in Power BI forecasting, COVID period excluded as an anomaly) – reduced reporting cycle by 30%. See Professional Experience for full origin story and iteration detail.

Canadian Crime Statistics Dashboard

Mar 2025 – Apr 2025

Power BI, DAX, Excel, Adobe Photoshop

- Interactive dashboard analyzing 2022–2023 StatsCan crime data with a 4-level geographic drill-down (Country → Province → Region → Municipality); custom DAX measures for crime per capita, violent-crime per capita, clearance rate, and charge rate; 10-year forecast, demographic breakdowns by gender/age/sentence length, and background-imagery storytelling.

Stock Market Portfolio Dashboard – Power BI Learning Project

Sep 2025 – Oct 2025

Power BI, DAX

- Conceptual dashboard replicating institutional stock portfolio reporting for senior management, with portfolio → sector → security drill-downs; DAX measures for active return, alpha, tracking error, and drawdown; built for executive storytelling and decision support. Self-directed learning project – not built on live trading data.

Interactive Power BI Resume Dashboard

Jan 2026

Power BI, DAX, Excel

- Self-directed, multi-page dashboard using own resume as the dataset: interactive Gantt-style career timeline (2017–present) with drill-down tooltips, filterable projects table with tool-usage charts, certifications tracker, and course breakdown by discipline.

Full-Stack & Software Engineering

JobTrackr – AI-Assisted Job Application Management Platform

Sep 2025 – Dec 2025

PostgreSQL, Node.js, Express.js, Angular (TypeScript), GitHub Actions, Postman, pgAdmin

- Co-developed an enterprise-ready job-application tracking platform with an AI processing pipeline; led system architecture, front-end/back-end integration, AI pipeline design (mock-driven testing to decouple from live AI services), end-to-end testing strategy, and Agile sprint coordination; established CI/CD via GitHub Actions.

Gradified – Verified Hiring Platform

Feb 2026 – Apr 2026

CPSC 499, Tech Entrepreneurship – Founder & CEO

- Founded and pitched a B2B SaaS startup concept replacing resumes with verified work records and a psychometric culture-fit engine; owned vision, go-to-market strategy, business model and revenue architecture, a 3-scenario financial model (pessimistic/realistic/optimistic), competitive positioning, and the investor-style pitch delivery.

Portfolio RAG Assistant

Aug 2026 – Sep 2026

TypeScript, Node.js/Express, React, Azure AI Search, Azure OpenAI (GPT-5-mini), Ollama

- Designed, built, and deployed a production retrieval-augmented-generation system that answers questions about own work strictly from a curated knowledge base, with per-answer source citations and a canonical no-answer fallback for unsupported questions; implemented hybrid BM25 + HNSW retrieval, an LLM reranker using a selection-only JSON contract to gate unsupported queries without a hand-tuned threshold, and an ingestion-time Projects Catalogue chunk that resolved broad “what projects” queries without runtime intent-detection code.
- Hardened the Express API (rate limiting, CORS lockdown, request/body caps, centralized error handling that never leaks stack traces or provider names) and validated retrieval quality against a 35-question regression suite; built a provider-agnostic architecture that swaps between free local Ollama models and Azure OpenAI via a single environment variable for zero-spend development.

Parallelized Sorting Algorithm

Mar 2024 – Apr 2024

Java, Fork/Join Framework

- Implemented parallel merge sort using Java's Fork/Join concurrency framework; demonstrated significant runtime reduction on large datasets versus sequential approach.

Database & Information Systems

Airline Database System

Feb 2024 – Apr 2024

SQL, MS Access

- Designed ER diagrams, relational schemas, normalization, and SQL queries for an airline management system in a 5-person team within a 45-day academic timeline, interpreting a formal Business Requirements Document.

Digital Transformation & Platforms

AKU ECD Data Digitalization Platform

Nov 2025 – Mar 2026

SharePoint, Power Automate, Microsoft Forms

- Translated requirements from 20+ international schools into a structured digital assessment system: SharePoint platform, automated data collection workflows, multi-level approval automation, and assessment database.

AKU ECD Leadership Hub Redesign

Nov 2025 – Mar 2026

SharePoint

- Resolved a cross-org permissions block that had left the hub inaccessible to most intended users across 20+ schools globally; then restructured navigation, information hierarchy, and stakeholder workflows, corrected an exposed-settings UX error, and added a cross-country shared resource page based on direct requests from country leads. See Professional Experience for full detail.

Roshtay.com – Web & AI Solutions Studio

Apr 2026 – Present

Claude Code, Stitch, Perplexity, Vercel, GitHub

- Built and launched a live client-facing web and AI solutions studio using a structured multi-tool workflow; 3 production client demo applications deployed.

Networking & Security

Network Security: Threats, Challenges, and Modern Defenses

Feb 2025 – Apr 2025

Research & Technical Writing, Microsoft PowerPoint – CPSC 344, 3-person team

- Co-authored a research paper covering the cyber threat landscape (malware, ransomware, phishing, DoS/DDoS, insider threats), real-world case studies (WannaCry 2017, SolarWinds 2020, Equifax 2017, Kaseya 2021), modern defense strategies (AI/ML in cybersecurity, zero-trust architecture, encryption, MFA), and global regulatory frameworks (GDPR, CCPA, NIST, ISO 27001, HIPAA, PCI DSS). Wrote the executive summary and research methodology, and designed/delivered the final presentation and formatted document.

Security Log Alert Script

Jun 2026

PowerShell

- Built an automated log-parsing script that flags failure-pattern entries from production log data using tiered alert-escalation logic based on pattern frequency, mirroring the operational monitoring logic built during the PHSA co-op.

Python Security Log Analyzer

Jun 2026

Python

- Built a log-analysis tool classifying source IP failure patterns; rejected a single-threshold detection model after evaluating its false-positive cost, and implemented a two-tier WARNING/CONFIRMED severity model that reduces noise while maintaining detection sensitivity – the same trade-off underpinning production SIEM systems.

Bash SSH Security Log Monitor

Sep 2026

Bash, grep, awk, GNU date

- Built the third project in a three-language security-monitoring toolset, porting the same two-tier WARNING/CONFIRMED severity model established in the Python and PowerShell versions to Linux SSH authentication logs; used grep/awk parsing and Bash associative arrays to aggregate per-source-IP failure counts inside a rolling time window, with an end-to-end test suite asserting expected alert behavior on seeded WARNING/CONFIRMED/NORMAL cases and optional cron-based scheduling for continuous monitoring.

EDUCATION

Bachelor of Science, Computer Science – University of Northern British Columbia, Prince George, BC

Expected April 2027

Co-op Program | Minors: Management Information Systems, Philosophy

- 106 earned credit hours through Summer 2026 term – Good Standing every term.

Higher Secondary Certificate (HSC) – Aga Khan Higher Secondary School, Karachi, Pakistan

2021

GPA: 89.5% | General Science (Computer, Math, Physics)

O Level (Cambridge) – The Academy School, Karachi, Pakistan

2019

GPA: 75% | Computer Science & Mathematics

CERTIFICATIONS

- TryHackMe: Active Directory Basics [Completed, June 2026]
- Microsoft – PL-300, Power BI Data Analyst [In Progress]
- Microsoft – Explore Core Data Concepts [Completed]
- Microsoft – Explore Data Roles & Services [Completed]
- Microsoft – Introduction to Azure Data Core Concepts [Completed]
- Microsoft – Explore Fundamental Relational Data Concepts [Completed]
- ISC2 Certified in Cybersecurity (CC) [Planned]
- DP900 [Planned]
- IELTS Academic: 7.5 (Expired Jan 2024)
- International Kangaroo Mathematics Contest – Cadet Level, High Achiever & T-Shirt Winner (2016)

- Higher Religious Education (Community Studies) [Passed, 2021]

LEADERSHIP, RECOGNITION & COMPETITIONS

JDC West - UNBC

- 1st Place, Business Technology Management, JDC West 2026 (COMM 498, Special Topics: JDC West, Fall 2024 term) – UNBC's first BTM podium in 19 years. Case theme: post-acquisition IT modernization for a senior care home operator. The acquired company's employees were already frustrated by a visible shift in leadership attention toward the newly acquired organization, and were now also being asked to adopt new IT they relied on daily for care delivery. Management wanted the acquiring company's IT standards; a full platform migration risked deepening that resentment and exceeding budget.
- Team of three evaluated three directions: retain the acquired company's legacy IT, fully migrate to the acquiring company's system, or bring in third-party software that replicated the specific functionality management valued without the cost or disruption of a full platform swap. The team recommended the third-party hybrid approach, paired with a structured change-management and adoption plan.
- Individual contribution: took primary ownership of the technology and implementation side of the analysis – evaluated the practicality of each technology direction against budget and adoption constraints, worked out how the recommended approach would actually be rolled out with the morale situation in mind, and helped build and deliver the final 20-minute executive presentation. The overall hybrid strategy and change-management plan were a collaborative team outcome, not an individual one.
- Read teammates' relative strengths under time pressure and allocated roles accordingly: assigned the storytelling-strong teammate the opening narrative framing and closing recommendation/financials slides; took ownership of change management, risk and mitigations, and options comparison personally; had the third teammate lead KPI design with cross-checking from the other two; restructured delivery so all three spoke in rounds rather than one person carrying long stretches, improving pacing across the 20-minute window.
- Director of CHAD (2025–26) | Business Strategy Delegate (2026–27) | Business Technology Delegate (2025–26) | Athletics Team (2024–25).
- Achieved 75% win rate in internal mock competitions (3 of 4), consistently delivering top-ranked strategic recommendations and technical architectures under 3-hour constraints.
- Fundraised \$56,000+ (2025–26) and \$93,000+ (2024–25) for Spirit of the North Healthcare Foundation; completed 10 community volunteer hours per cycle.

University of Northern British Columbia

- President & Founder – Northern Ismaili Student Association (2023–24).
- President & Co-Founder – Aga Khan School Students' Club (2023).
- Note Taker – UNBC Academic Resource Center (2023).
- Intramural Official (2022–2025).

Scouting – Ismaili Nizari Scouts (2008–2023)

- Head of Training Team & Assistant Scout Leader (2016–2023); organized Ignite Overnight Camps, National Hikes, and district competitions.
- Scout of the Year x2 | Best Camper | Flag of Honour | Token of Appreciation | 89 hrs Community Service (MOVE Program).
- Rank Badges: Membership, Hamdam, Istaqlal (Rovers); Yakeen (Boy Scouts).
- National & International Participation: JOTA-JOTI, National Desert Hike, Scouts for SDGs, Scout Go Solar, Tide Turner Plastic Challenge, World Scout Environment Program Badge.

GLOBAL VOLUNTEERING & COMMUNITY

- Event Coordinator & Organizer – Initiative for Global Empathy (2019–Present): Led COVID-19 awareness programs, mindfulness/mental health sessions for community youth and women, gender & sexuality equality webinar series, plantation drives, and cleanliness campaigns.
- Facilitator – Global Encounters: Connect Camp, AKDN (2021).
- Teacher & HRE Assistant Coordinator – Nizari Community Education Center (2021–Present).
- Board Member – Aga Khan Youth & Sports Area Committee (2017–2019) | Audio & Visual Department, Nizari Community Education Center (2017–2019).
- 1st Place – Thirst of Knowledge Inter-Institutional Charts & Model Competition (Community Level).
- Exceptional Contributions Award – MOVE Program's Citizenship Award Ceremony 2017, Family Education Services Foundation.

ACADEMIC & CURRICULAR COMPETITIONS

- Model United Nations – Iqra University MUN: Honourable Mention (2017), Delegate (2016); Destiny MUN V, Whales College: Delegate (2017).
- 1st IT Webinar & Quiz Competition – 5th place, Aga Khan Higher Secondary School (2020).
- Represented Sindh in Pentathlon Olympics – 5th place nationally, National Federation of Pakistan.

SPORTS & ATHLETICS

- Football Captain – AKHS College Team (2019–21); Jahangir Memorial Football Academy U-19 & Senior Club; School Football Team, The Academy (2017–19).

- Tried for UNBC Men's Soccer Team (2024) – trained through preseason with the squad but was not selected for the roster; identified specific gaps in decision-making speed under pressure, ball control at pace, and sustained high-intensity performance, and continued targeted training on those areas when the opportunity remained open.
 - Baitussalam Olympiad 2020 – 2nd in Football, 2nd in Volleyball, Participated in Athletics.
 - College Sports Society Coordinator – AKHS (2019–20) | Class Representative (2019–20).
 - Inter-House Football Tournament – 1st Place, The Academy School (2015–16) | Annual Sports Day 1st Place (2019).
-

MASTER RESUME – Complete information bank. Trim to 1–2 pages per JD by selecting the most relevant sections for each application. Verified items only – do not add unverified claims. Detail expanded August 2026 to correct AKDN's root-cause framing (access/permissions before UX) and add fuller JDC West and PHSA context for interview-consistency purposes. Updated September 2026 to add the Bash SSH Security Log Monitor (Networking & Security) and Portfolio RAG Assistant (Full-Stack & Software Engineering) projects. Tailored resumes should still be trimmed to the XYZ bullet formula per the resume-cover-letter skill rules, not copied at this level of detail.
